

GROWTH SCENARIOS

transportation-Focused Generic Environmental Impact Statement

The t-GEIS is addressing 4 *hypothetical* Cornell population growth scenarios over the next 10 years

- Scenario 1: Regional background growth of 1.5% per year
no Cornell population growth
- Scenario 2: 0.1% Cornell population growth per year
= approximately 300 new faculty/staff/grad students
- Scenario 3: 0.5% Cornell population growth per year
= approximately 1,500 new faculty/staff/grad students
- Scenario 4: 1.0% Cornell population growth per year
= approximately 3,000 new faculty/staff/grad students
