
TODAY'S OPEN HOUSE

t-GEIS Transportation Study

This is the second public open house being conducted for the t-GEIS Transportation Study. Last spring you helped us identify deficiencies in the community's overall transportation network, and you told us what it would take to improve bicycle, pedestrian, transit and other modes of commuting.

The purpose of today's open house is to get your feedback on potential transportation improvements and other neighborhood concepts. The goal is to improve community-wide transportation alternatives and increase use of alternatives, ***especially walking, bicycling, transit, and other modes to reduce dependency on single occupancy vehicles.***

LET US KNOW WHICH POTENTIAL IMPROVEMENTS AND PROGRAMS YOU WOULD SUPPORT
