# POTENTIAL BUS IMPROVEMENTS

---

Based on a review of the current services and infrastructure coupled with survey responses, the consultant team has proposed a series of improvements to the area transit system. While many of these would need to be undertaken by TCAT, some could be done by Cornell and many will require a community effort.

- Conduct a comprehensive transit service study
- Improve the coverage and circulation of routes county-wide
- Improve frequency, connectivity and service hours where possible
- Encourage more employers to promote transit and more municipalities to contribute to TCAT
- Improve visibility of transit on campus
- Improve route information - online and at stops
- Provide “Next Bus” indicators at key stops and work to make realtime bus information available online
