

Transportation-focused Generic Environmental Impact Statement
For
Transportation Impact Mitigation Strategies

t-GEIS

MONTHLY UPDATE
May 15, 2007

Over the last month the consultant team for the t-GEIS has made progress on the following tasks:

- Conducted two public open houses in April to present:
 - What we heard from the public and through the web-based travel survey
 - Preliminary results of the analysis
 - Potential improvements for enhancing alternative modes of transportation to Cornell, mitigating traffic impacts, and improving livability.

Open house attendees were also asked to provide input and feedback on the potential improvements.

All material that was on display at the public open houses is on the t-GEIS web site:

<http://www.tgeisproject.org/>

- Met with the TCAT Board to review potential improvements.
- Attended Cornell Comprehensive Master Plan (CMP) workshops in April; shared information and coordinated potential improvements with the CMP consultant team.

Next Steps:

- Continue to meet with local transportation planners, TCAT and the Resource Committee to review livability and transportation impacts and preliminary mitigation measures.
- Provide project updates to Town and City Planning Boards in June.
- Write the Draft t-GEIS.
